

A BETTER WAY TO MANAGE YOUR INVENTORY

- Do you want to increase the ROI on your electronic parts inventory dollars?
- Do you want instant information on usage of your critical parts?
- Do you want to easily control and maintain completely accurate inventory and usage information?

If your answer is YES, then Carlton-Bates Company (CBC) Inventory Solutions are for you!

Vendor Managed Inventory (VMI)

VMI is an innovative inventory solution that provides up-to-date order tracking, facilitates spot buys and generates history-versus-forecast analyses. It also tells you how much inventory you have and provides detailed transactions, mobile scanning/bar coding and scheduled physical inventories.

Vending

Carlton-Bates Vending Solution is the perfect companion to VMI. With our in-house smart vending machine, you will:

- Reduce OEM/MRO inventory dollars
- Have strategic, on-site JIT parts availability
- Have off-hours parts availability
- Improve service levels
- Reduce equipment outage
- Lower the total cost of management
- Stock multiple manufacturers' products
- Enjoy flexible agreements

CBC Host Link Supports It All

New to Carlton-Bates is our Host Link tracking system that lets you see transactions and inventory levels online in real-time. It is, of course, backed by CBC's unparalleled commitment to customer service. With Host Link's "Data Interface," it sends email orders and shows transactions and detailed management reports – allowing you to streamline your supply chain and optimize your inventory.

CONTACT YOUR LOCAL CBC REPRESENTATIVE OR CALL J.D. RAULS AT 501-425-4210 FOR MORE INFORMATION.
