

ASSEMBLED SOLUTIONS

Design • Build • Deliver

We not only build products, we can design them for you, too.

A highly flexible, customizable approach to meet any challenge.

Assembled Solutions is a unique set of customized services from Carlton-Bates Company. It's a specialized way to address your problem and find the perfect answer on an **individual, case-by-case basis**. Our engineers will **research your needs**, budget and timeframe, then create the best solution.

We'll determine the components needed, find them at a **lower cost** and assemble them at our facilities in the United States or Mexico. Plus, we've worked with **almost every type of product**, from deep fryers and elevators to oil drillers, electric car charging stations, conveyors and cranes. It's all about **meeting your needs**, whatever those may be.

Assembled Solutions helps our customers:

1. **Reduce lead times** with production schedules being measured in days, not weeks
2. **Save money** by using our buying power to reduce the cost of parts and lower the cost of production and manufacturing
3. **Reduce your labor costs** because you won't spend time purchasing, receiving, transporting or assembling
4. **Add capacity** to meet demand without increasing fixed costs by utilizing the flexibility that comes with outsourcing
5. **Manage logistics** through VMI, consignment or consolidated shipping through our DCs, including another 500 locations across the WESCO family
6. **Make products better** by using our engineers' expertise in improving products and services
7. **Create Value** through Lean by eliminating waste throughout the supply chain

We have the expertise.

- » Dedicated electrical, mechanical and industrial engineers
- » ISO 9001:2000-certified
- » UR-certified
- » UL 508 registration
- » In-house technical and sales support
- » CAD and tooling capabilities
